

Blinkit Sales Analysis – Insights Report

>Here the dashboard of Blinkit

1. Project Overview

This project analyzes Blinkit sales data to uncover trends in sales performance, outlet characteristics, and product categories. The dashboard provides insights into total sales, average ratings, item distribution, and outlet performance.

2. Key Metrics Summary

- **Total Sales:** 603K
- **Number of Sales:** 4K
- **Average Sales Value:** 141
- **Average Rating:** 3.9

The business maintains a stable average sales value with moderate customer satisfaction.

3.Sales Trends Over Time

- Sales show a **steady increase from 2012 to 2018**
- Peak sales observed around **2018 (~260K)**
- Post-2018, sales show a **declining trend**

Insight:

Growth phase followed by decline may indicate:

- Increased competition
- Market saturation
- Operational or demand shifts

4.Outlet Performance Analysis

Outlet Location Type

- **Tier 3 outlets generate the highest sales (603K)**

Insight:

- Smaller cities (Tier 3) are the **primary revenue drivers**
- Indicates strong demand in less saturated markets

Outlet Size Distribution

- **Medium outlets dominate (430K sales)**
- Small outlets contribute moderately (164K)
- High-size outlets contribute the least

Insight:

- Medium-sized stores are the **most efficient and profitable**
- Large outlets may have higher costs but lower relative returns

5. Product & Category Insights

Top Performing Categories

- Dairy (150 sales)
- Starchy foods (149)
- Household & Snack items (~147)

Low Performing Categories

- Baking items (128)
- Others (120)

Insight:

- Essential goods drive the majority of sales
- Non-essential or niche items underperform

6.Fat Content Analysis

- Low Fat and Regular items show **almost equal sales contribution**
- Slight edge toward **Low Fat products**

Insight:

- Customers are becoming **slightly health-conscious**
 - Opportunity to expand low-fat product lines
-

7.Outlet Type Comparison

Outlet Type	Avg Sales	Rating	Total Sales	No. of Sales
Grocery Store	141	4.0	78,132	555
Supermarket Type1	141	4.0	131,809	932

Supermarket Type2	142	4.0	131,477	928
----------------------	-----	-----	---------	-----

Insight:

- Supermarkets outperform grocery stores in volume
 - Ratings are consistent across all outlet types
-

8.Overall Business Insights

- Tier 3 cities are the **strongest market segment**
 - Medium-sized outlets provide **maximum efficiency**
 - Essential goods dominate customer purchases
 - Sales growth peaked and is now declining → needs attention
 - Customer ratings are stable but not excellent (scope for improvement)
-

9.Recommendations

1. **Expand in Tier 3 cities**
 - High demand and strong performance
 2. **Focus on Medium-sized outlets**
 - Best balance between cost and revenue
 3. **Boost declining sales trend**
 - Marketing campaigns
 - Discounts or loyalty programs
 4. **Improve customer ratings (3.9 → 4.5+)**
 - Better delivery experience
 - Product quality improvements
 5. **Promote high-demand categories**
 - Dairy, snacks, household essentials
 6. **Expand low-fat product range**
 - Align with health trends
-

10.Conclusion

The analysis highlights that Blinkit's growth is driven by Tier 3 markets and essential product categories. However, declining sales trends and moderate customer ratings indicate the need for strategic improvements in marketing, operations, and customer experience.
